Detailed Action

Specification

The disclosure is objected to because of the following informalities: There are numerous misspelled words in the specification. For example, in page 1, line 17 has "and and"; page 3, line 28 has "developped"; page 4, line 13 has "responsability"; page 4, line 15 has "data bases"; and etc.

Appropriate correction is required.

The abstract of the disclosure is objected to because of misspelled words such as "tipicaly". Correction is required. See MPEP § 608.01(b).

Claims 1-36 are objected to because of the following informalities: There are numerous misspelled words throughout the claims and incomprehensible words. For example, in claim 3, the preamble has "(a) a (d)"; claim 30 has incorrect spelling of the word "obtaing", "predetermied", "inhibitting", "trasmitted", and etc. Also, claim 30 has the word "tick" that is incomprehensible in the claim language. Appropriate correction is required.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 27-30, and 35-36 drawn to on-the-spot processing of credit application, classified in class 705, subclass 38.

- II. Claims 21-26, 31-34, drawn to counting time elapsed and estimating processing time on a computer, classified in class 345, subclass 633.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as credit application and a computer for processing time. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Denise Stoker on June 14, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Examiner was not able to reach Denise Stoker.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
